Scale It

Pune, Maharashtra, India

## Summary

If you want your software to be delivered  
better, faster, and cheaper  
Then I am the person for you.

I Build It, Ship It & Scale It

From deploying secure, scalable infrastructures to crafting full-  
stack experiences, I'm a passionate engineer blending DevOps,  
Backend, Frontend, and a pinch of AI Agents magic to solve real-  
world problems.

Currently at Barclays as a DevSecOps Engineer (SDE 2), I drive  
end-to-end automation, cloud architecture, and CI/CD excellence  
across mission-critical platforms like the Amazon Arrow Card.  
I've led multi-region AWS deployments, built CTO-approved  
strategic solutions, and created real-time observability dashboards  
empowering teams to move faster and safer.

What I love building:

Backend APIs using FastAPI, Node.js, Spring Boot

## Sleek frontends with React, Tailwind, ShadCN, and a pinch of UX  
care

Secure & scalable CI/CD pipelines structure with GitLab + Jenkins

☁️# Cloud-native AWS solutions with ECS, Lambda, Step Functions  
& more

# End-to-end infra with IaC, EventBridge, VPC, and security  
guardrails

Internal tools that save hours and make engineers smile

Let's connect if you're into cloud infra, fast shipping products, or  
scaling cool ideas!

Always up for a chat about DevOps, AI, open-source, or your next big idea.

---

## Experience

### Barclays

2 years 6 months

Software Engineer SDE 2 - BA4

March 2025 - Present (10 months)

Pune, Maharashtra, India

Software Engineer SDE 1 - BA3

July 2023 - March 2025 (1 year 9 months)

India

Building Next Gen Amazon Barclaycard

# Supporting the development and deployment of a modernized, scalable platform for the Amazon Barclaycard, ensuring high performance and reliability.

# AWS Cloud Solutions & Multi-Region Implementation: Led efforts to implement a multi-region setup for key systems, enhancing resilience and availability across critical projects.

# Automation & Monitoring: Developed and deployed CloudWatch dashboards, automated alerting solutions, and enhanced monitoring to ensure seamless operations and visibility.

# Cost Optimization & Efficiency: Contributed to AWS cost reduction through tagging utilities and process optimization, driving significant savings across deployments.

# Cross-Functional Collaboration: Worked with multiple teams to ensure consistent adoption of DevOps best practices, streamlining deployments, and optimizing resource monitoring.

### Finarkein Analytics

BackEnd Developer

April 2023 - June 2023 (3 months)

Pune, Maharashtra, India

I was responsible for working on the Financial Information Provider (FIP) side, where my role involved updating APIs and implementing Kafka queues for consent.
